

ALUMINIUM COLD HEADING WIRE BY GUTMANN ALUMINIUM DRAHT GMBH

we wire the world

Gutmann specializes in drawn aluminium wires used for cold formed components in the automotive, aerospace, construction, cold forging, welding, etc. industry. We produce dimensions up to 25 mm/0.98425 in in more than 40 different alloys.

Additional packing formats

- Ring packing with or without protective paper wrapping
- Metal or cardboard formers with approx 300 kg / 661.39 lb
- Coil packaging with approx 200 - 1000 kg / 440.92 - 2204.6 lb
(wound conically, cylindrically or layer on layer, in various sizes)

ALUMINIUM COLD HEADING WIRE BY GUTMANN ALUMINIUM DRAHT GMBH

we wire the world

Your benefit when you use GUTMANN ALUMINIUM COLD HEADING WIRE

- ISO certified company: DIN ISO TS 16949, DIN ISO 9001 and 14001
- Technical guidance and development partnership guarantee continuous improvements
- A large variety of alloys
- Special wire surface treatments (shaving process) removes oxides and ensures better forming characteristics in your process
- In-house die maintenance guarantees a proper surface quality and quick reaction time
- Different heat treatment methods for your individual requirements
- Fast responsive prototyping without high expense
- Layer to layer winding for coil processing
- Reliable raw material suppliers
- Laboratory tests, such as mechanical tests, metallographic inspections (structure condition, grain boundary/size, layer structure, image documentation), spectrum analysis and selection of special material make our service complete

GUTMANN ALUMINIUM DRAHT GMBH is one of the leading producers of DRAWN WIRE and PROFILES made of aluminium and wrought aluminium alloys

We produce aluminum wires and drawn profiles for various industrial sectors.

Please do not hesitate to contact us for further questions and requirements.
